Y I S H E L F : SERIES 200 INSTALLATION INSTRUCTIONS

Product Features

- Equipped with SoundDefy™ noise concealing technology
- Premium 304 Grade Stainless Steel
- Sloped Bottom
- Hand Crafted
- Hardware included for a complete installation

Tools You'll Need

Congratulations On Your Purchase

“Quality is
not an act,
it is a habit.”
-Aristotle

Congratulations on purchasing the finest. Quality has been a habit at Neelnox since the very first day of its inception in 1963 and it is a habit that has strengthened with time. We hope that you are completely satisfied with your new product. Prior to installation please take a few moments to review the guidelines listed here. Should you have any questions or concerns, or if you'd like to share just how happy you are with the product, please feel free to contact us at info@neelnoxmosaics.com.

Installation

- Determine the location where you would like to install the Series 200 Y I SHELF™.
- Place the shelf at the desired location on the substrate and mark along the outer edges of the shelf in contact with the wall while ensuring with a water level placed on the top rim that the shelf is level.
- Make an additional marking which is 1/2" above and parallel to the bottom marking. Place the included L shaped hardware labelled L-Plate along this new marking.
- Using a water level ensure that the L-Plate is level. Make additional markings along the holes on the L-Plate. Ensure that there are no plumbing pipes inside the wall behind markings.
- Drill a hole on these markings that is suitable for the wall anchor. Insert the wall anchor supplied with the screws. Hold the L-Plate in place and secure it with the screws.
- Prepare the included Y I BOND™ by mixing the resin and hardener in equal parts.
- Spread the prepared Y I BOND™ resin and hardener along the top face of the L-Plate.
- Slide in the Series 200 Y I SHELF™ over the L-Plate. Place a weight (approx. 7 lbs) over each L-Plate and secure the Series 200 Y I SHELF™ to the wall with tape.

Care & Maintenance

- Neelnox recommends 3M Stainless steel cleaners or a damp soft cloth, mild dishwashing soap and a non abrasive sponge if required. Always clean along the direction of the grain. Do not use acid or corrosive solutions, chloride solutions, abrasive pads or steel wool for cleaning.
